

- Mona was 3 times as old as Radha 6 years ago and will be $\frac{5}{3}$ times as old as Radha after 6 years. What is the present age of Radha? **(Age) NIMCET-2007**
(a)11 (b)12 (c)13 (d)none
- Pushpa is twice as old as Rita was two years ago. If the difference between their ages be 2 years, how old is Pushpa today ? **(Age) NIMCET-2011**
(a)6 years (b)8 years
(c)10 years (d)12 years
- When Rajveer was born his father was 32yr older than his brother and his mother was 25yr older than his sister. If Rajeev's brother is 6 yr older than Rajeev and his mother is 3yr younger than his father, then how old was Rajeev's sister when he was born?
(Age) NIMCET-2013
(a) 15yr (c) 7 yr
(b)14yr (d) 10yr
- The sum of ages of a daughter and mother is 63 yr. Four years back mother's age was 4 times that of daughter's age at that time. What is present age of mother? **(Age) NIMCET-2014**
(a)46 yr (b)48 yr
(c)50 yr (d)59 yr
- Father is aged three times more than the age of his son Rohit. After 8 yr, he would be two and a half times of Rohit's age. After further 8 yr, how many times would he be of Rohit's age?
(Age) NIMCET-2014
(a)2 times (b)3 times
(c)2.5 times (d)3.5 times
- Two person S and M have made the following statement among themselves.
 - S says that I am certainly not over 40 year.
 - M says that I am 38 years and you are at least 5 year old than me.
 - S says you are at least 39 years .
 - If all the above statements are wrong, what are the ages of M and S? **(Age) NIMCET-2017**
 (a)36 and 40 (b) 36 and 41
(c) 37 and 40 (d) Cannot be determined
- John is 20 years older than Steve. In 10 years, Steve's age will be half that of John. What is Steve's age now?
(Age) NIMCET-2017
(a)2 (b)8 (c)10 (d)20

- My mother is twice as old as my brother. I am five years younger to my brother but three years older to my sister. If my sister is twelve years of age, how old is my mother? **(Age) NIMCET-2018**
(a)24 (b)30 (c)40 (d)50
- A person's present age is two fifth of the age of his mother. After 8 year, he will be one half of the (age) of his mother. What is the present age of his mother? **(Age) NIMCET-2020**
(a) 60yr (b)50yr
(c)40yr (d)30yr
- Radlia is twice as old as Rita was 2 yr ago. If difference between their ages is 2 yr, how old is Radha today? **(Age) NIMCET-2021**
(a)6 (b)8 (c)10 (d)12
- A person's present age two-fifth of the age of his mother. After 8 yr, he will be one-half of the age of the age of his mother. What is the present age of the mother? **(Age) NIMCET-2022**
(a)40 yr (b)60 yr (c)30 yr (d)50 yr
- Rakesh says to Mahesh, "I am as old as you were when I was one- third as old as you are. "If the sum of their ages is 60 yr, find the present age of Mahesh (in years). **(Age) NIMCET-2023**
(a)45 (b)36 (c)30 (d)24

ANSWER

1	b	2	b	3	d	4	b	5	a
6	d	7	c	8	c	9	c	10	b
11	a	12	b						

SOLUTION:

1. (b)

Let present age of Mona and Radha = x, y

$$x - 6 = 3(y - 6)$$

$$x = 3y - 12 \quad \dots\dots\dots(1)$$

$$x + 6 = \frac{5}{3}(y + 6)$$

$$3x + 18 = 5y + 30$$

$$3(3y - 12) + 18 = 5y + 30$$

$$9y - 5y - 18 = 30$$

$$4y = 48$$

$$y = 12$$

$$\text{Radha} = 12 \text{ yr.}$$

2. (b) Let the present age of Pushpa be x yr. Then, the present age of Rita would be $(x - 2)$ yr. So, $x = 2(x - 2 - 2)$

$$\Rightarrow x = 2x - 8$$

$$\Rightarrow x = 8 \text{ yr}$$

Therefore, the present age of Pushpa is 8 yr.

3. (d) Suppose,

Rajeev's age = 0 (Born)

Then, Rajeev's brother's age = 6yr

Rajeev's father's age = $6 + 32 = 38$ yr

Rajeev's mother's age = $38 - 3 = 35$ yr

Rajeev's sister's age = $35 - 25 = 10$ yr

4. (b) Let the present age of daughter = x yr
and present age of mother = y yr.

According to the question,

$$x + y = 63$$

4yr back,

$$\text{Daughter's age} = (x - 4) \text{ yr}$$

$$\text{Mother's age} = (y - 4) \text{ yr}$$

$$\therefore 4(x - 4) = y - 4$$

$$4x - 16 = y - 4$$

$$4x - y = 12$$

From Eqs. (i) and (ii), we get

$$x + y = 63$$

$$\Rightarrow 4x - y = 12$$

$$\therefore x = 15 \text{ yr}$$

$$\therefore x + y = 63$$

$$\Rightarrow 15 + y = 63$$

$$\Rightarrow y = 48 \text{ yr}$$

Hence, present age of mother = 48 yr.

5. (a) Let the present age of Rohit = x yr

and present age of Rohit's father = $x + 3x = 4x$ yr

After 8 yr,

Rohit's age = $x + 8$ yr

Rohit's father's age = $4x + 8$ yr

According to the question,

$$\Rightarrow \frac{5}{2}(x + 8) = 4x + 8$$

$$\Rightarrow \frac{5x}{2} + 20 = 4x + 8$$

$$\therefore x = 8$$

i.e. Rohit age after 8 yr = 16 yr

Rohit's father age after 8 yr = 40 yr

Now, after further 8 yr

Rohit age $16 + 8 = 24$ yr

Rohit's father = $40 + 8 = 48$ yr

Hence, Rohit's father age will be two times of Rohit age

6. (d) If all the given statement are false, then the information will be as follows

(i) $S > 40$ years

(ii) S is 1,2,3,4 or 5 years older than M and $M \neq 38$ years

(iii) $M \leq 39$ years

According to the information and from options, M 's age can be of 36 or 37 or 39 years.

And S 's age can be of 40 or 41 or 42 or 43 or 44 years.

Hence, exact age of M and S cannot be determined.

7. (c) Let the age of Steve be ' S ' and John be ' J '.

According to the question,

$$\text{And, } J = S + 20$$

$$\Rightarrow S + 10 = \frac{J+10}{2}$$

$$\Rightarrow 2S + 20 = J + 10$$

$$\Rightarrow 2S + 10 = S + 20$$

$$S = 10$$

Present age of Steve is 10 years.

8. (c) Age of man's sister = 12yr

$\therefore$ Age of man = $12 + 3 = 15$ yr

$\therefore$ Age of man's brother = $15 + 5 = 20$ yr

Hence, age of man's mother = $20 \times 2 = 40$ yr

9. (c) Let the mother's present age be x years.

Then, the person's present age = $\frac{2}{5}x$ years

According to questions,

$$\left(\frac{2x}{5} + 8\right) = \frac{1}{2}(x + 8)$$

$$\Rightarrow \frac{2x+40}{5} = \frac{1}{2}(x + 8)$$

$$\Rightarrow 4x + 80 = 5x + 40$$

$$\Rightarrow x = 40 \text{ yr}$$

10. (b) 2 yr ago, Rita's age = x (let) and Radha's present age = $2x$

According to the question, Difference between their

ages = 2yr $\Rightarrow 2x - (x + 2) = 2 \Rightarrow 2x - x - 2 = 2 \Rightarrow x = 4$

Hence,

Radha's present age = $4 \times 2 = 8$ yr

11. (a) Let age of mother be x yr.

Then, age of person = $\frac{2x}{5}$

According to the question, after 8 yr

$$\frac{1}{2} \times (x + 8) = \frac{2x}{5} + 8$$

$$x + 8 = 2 \left(\frac{2x+40}{5}\right)$$

$$5x + 40 = 4x + 80x$$

$$= 40 \text{ yr}$$

Hence, present age of Mother 40 yr

12. (b) Let Rakesh and Mahesh's present age are x yr and y yr, respectively.

$$x + y = 60 \quad \dots\dots\dots(i)$$

Let k years ago,

MAARULA CLASSES

TARGET- NIMCET / CUET.PG By: Amit Katiyar (MCA-JNU)

NIMCET PAPER

AGE

PYQ

Scan the QR & Download Our App Now.

$$\frac{y}{3} = x - k \quad \dots\dots\dots(ii)$$

$$y - k = x \quad \dots\dots\dots(iii)$$

$$\Rightarrow y - x = k$$

Putting the value of k from Eq. (iii) in Eq. (ii)

$$\frac{y}{3} = x - y + x$$

$$\Rightarrow y = 6x - 3y$$

$$\Rightarrow 4y = 6x$$

$$\Rightarrow 2y = 3x$$

From Eq. (i)

$$2x + 2y = 2 \times 60$$

$$\Rightarrow 2x + 3x = 120 \quad \text{[from Eq. iv]}$$

$$\Rightarrow x = \frac{120}{5} = 24 \text{ yr}$$

$$y = 36 \quad \text{[from Eq. (i)]}$$
