

- What is the next letter in the series OTFFFFSSSN?
(Series) NIMCET-2008
(a)T (b)O (c)E (d)N
- What are the next three numbers in the given series.
1 1 2 1 2 2 3 1 2 2 3 2 3 3 4 1 2 2 3 2 3 3 4 2 3 3?
(Series) NIMCET-2008
(a)2, 3, 4 (b)2, 3, 2 (c)1, 2, 3 (d)4, 3, 4
- If $A + B = C + D$, $B + D = 24$, $D + E > A + B$, $C + D > A + E$, then which of the following is true?
(Series) NIMCET-2009
(a) $D > B > E > A > C$ (b) $A > B > D > E > C$
(c) $A > D > B > E > C$ (d) $D > A > B > E > C$
- What will come in place of the question mark (?) in the following series?
12 22 69 272 1365 ?
(Series) NIMCET-2009
(a)8196 (b)8195
(c)6830 (d)8184
- How many 5s are there in the following number series each of which is immediately followed by 4 but not immediately preceded by 6 ?
456 656 455 455 654 456 456 5454
(Series) NIMCET-2009
(a)One (b)Three (c)Four (d)Two
- Which should be the next two numbers in the series 28 25 5 21 18 5 14
(Series) NIMCET-2010
(a)11, 5 (b)10, 7
(c)11,8 (d) 5, 10
- Choose which pair of numbers carries next in the following sequence :
61, 57, 50, 61, 43, 36, 61,,,
(Series) NIMCET-2011
(a)29, 61 (b)27, 20
(c)31, 61 (d)29, 22
- The missing number in the given series 3, 6, 6, 12, 9,12 is
(Series) NIMCET-2012
(a)15 (b)18 (c)11 (d)13
- The missing number in the following series 6, 12, 21, ...,48 is
(Series) NIMCET-2012
(a)40 (b)33 (c)38 (d)45
- Find the odd number in the following series. 2,9, 28, 65, 126, 216, 344,...
(Series) NIMCET-2012
(a)28 (b)65 (c)126 (d)216
- A treasure chest has less than 100 gold coins. The number of coins is
(Number Series) NIMCET 2013
(a) One more than a multiple of 3
(b) Two more than a multiple of 4
(c) Three more than a multiple of 5 and
(d) Four more than a multiple of 6
How many coins are there in the chest?
(a)58 (b) 88 (c) 98 (d) 38

- Find the missing element in the series.
(Series) NIMCET 2013
A, CD, GHI, ..., UVWXY
(a)LMNO (b)MNOP
(c)NOPQ (d)QPQR
 - Which pair of number comes next in the following series?
(Series) NIMCET 2013
42 40 38 35 33 31 28
(a)25 22 (b)26 23
(c)26 24 (d)25 23
 - Find the number that comes next in the series
120, 99, 80, 63, 48,....
(Series) NIMCET-2014
(a)35 (b)38 (c)39 (d)40
 - What is the number that comes next in the series?
1, 2, 3, 6, 11, 20, 37, 68,
(Series) NIMCET-2014
(a)105 (b)124 (c)125 (d)126
 - Which letter in the word CYBERNETICS occupies the same position as it does in the English alphabet?
(Number Series) NIMCET-2015
(a)C (b)E
(c)I (d)T
- Directions [Q. Nos. 17-18]** the letter of English alphabet from A to M were written, leaving space for one letter between every two letters and then the remaining letters were inserted beginning with N and ending the series with Z after M.
(Number Series) NIMCET-2015
- Which letter would be 3rd to the right of the 7th letter from the left?
(a) C (b) O
(c) R (d) S
 - Which letter would be exactly in the middle of eighteenth letter from the beginning and fifteenth from the end?
(a)G (b)H
(c)J (d)L
 - Which of the following two patterns will fit in the blanks of the series $ZA_5, Y_4B, XC_6, W_3D, \dots$? (Series)
(a) VE_7 and U_2E (b) V_2E and U_7F
(c) VE_7 and U_2F (d) VF_7 and U_2E
 - Which of the following numbers comes next in the two-digit decimal number sequence 61,52,63,94,.....?
(Series) NIMCET-2015
(a)65 (b)64
(c)56 (d)46
 - Find the missing number in the series: 4, 7, 25, 10,, 20, 16, 19 (Series) NIMCET-2015
(a)13 (b)15
(c)20 (d)28
 - The number of common terms in the two sequence 17, 21,25,, ,817 and 16, 21,26,.... ,851 is

- (a)28 (b)39 (c)40 (d)87
- 23. How many pairs of letters are there in the word NECESSARY which have as many letters between them in the word as there are between them in the alphabet and in the same order.**
- (Alphabetical Series) NIMCET-2016**
- (a) One (b) two
(c) three (d) four
- 24. What is missing number in the series, 4, 7, 11, 18, 29, 47,....., 123, 199 ?**
- (Series) NIMCET-2016**
- (a)76 (b)77 (c)86 (d)87
- 25. The following series is obtained by considering representations of decimal 99 in different number system. The next two numbers in the sequence are 99, 90, 83, 78**
- (Series) NIMCET-2017**
- (a)71, 69 (b)69, 57
(c)67, 59 (d)69, 63
- 26. The missing number of the following series 336,210,120,60,.....,6 is**
- (a)24 (b)30 (c)34 (d)40
- 27. Find the missing term of the following series DCXW, HGTS,....., POLK, TSHG**
- (Series) NIMCET-2017**
- (a)KLOP (b)LKOP
(c)KLPO (d)LKPO
- 28. Which of the following pairs of numbers follow the number in the series 2, 4, 12, 24, 72,.....,..... ?**
- (Series) NIMCET-2017**
- (a)144, 432 (b)288,332
(c)332, 288 (d)432, 144
- 29. Which two of the following numbers comes in the next in the following sequence.**
- (Series) NIMCET-2017**
- 61, 57, 50, 61, 43, 36, 61,
(a)29, 61 (b)29, 20
(c) 29, 22 (d)31, 61
- 30. In the following sequence, which pair of numbers fill in the blanks?**
- (Series) NIMCET-2017**
- 1, 1, 3, 2, 8, 5, 21, 13
(a)54, 33 (b)34, 55 (c)55, 34 (d)33, 54
- 31. Find out the wrong number in the following series.**
- (Series) NIMCET-2018**
- 15,16,34,105,424,2124,12756
(a)16 (b)34 (c)424 (d)2124
- 32. Find the missing term in the series.**
- (Series) NIMCET-2018**
- 3,20,63,144,275.....
(a)354 (b)468 (c)548 (d)554
- 33. In the below series, you will be looking at the letter pattern, diagram pattern or number pattern. Fill in the blank in the end of the series. JAK, KBL, LCM, MDN,.....**
- (Series) NIMCET-2018**
- (a)OEP (b)NEO (c)MEN (d)PFQ
- 34. The number that comes next in the series**
- (Series) NIMCET-2019**
- 1,2,3,6,11,20,37,68,....

- (a)105 (b)124 (c)125 (d)126
- 35. What comes next in the following sequence**
- (Series) NIMCET-2019**

- 49. Identify the next two numbers in the following sequence:**
- (Series) NIMCET-2023**
- 17,20,9,12,5,6,3,2,.....
(a)2, 1 (b)0, 2 (c)1,2 (d)2, 0

ANSWER

1	d	2	d	3	d	4	d	5	d
6	a	7	d	8	b	9	b	10	d
11	*	12	b	13	c	14	a	15	c
16	c	17	c	18	b	19	c	20	d
21	a	22	c	23	a	24	a	25	a
26	a	27	d	28	a	29	c	30	c
31	d	32	b	33	b	34	c	35	a
36	d	37	c	38	c	39	d	40	b
41	a	42	a	43	a	44	a	45	a
46	c	47	a	48	b	49	d		

SOLUTION

1. (d) The letters are repeat ONE, TWO, THREE, FOUR and FIVE times respectively.
So, the required letter is N.

2. (d) Each 1 in the given series has the digits on it's right exceeding by the digits on the left by
1 1 2; 1 1 2 1 2 2 3;
1 1 2 1 2 2 3 1 2 2 3 2 3 3 4
1 1 2 1 2 2 3 1 2 2 3 2 3 3 4 1 2 2 3 2 3 3 4 2
3 3 4 3 4 4 5
So, next three numbers is 4, 3, 4

3. (d) $A + B = C + D$

$$B + D = 2A$$

$$D + E > A + B$$

$$C + D > A + E$$

From Eqs. (i) and (iv),

$$A + B > A + E \Rightarrow B > E$$

From Eqs. (i) and (iii),

$$D + E > C + D \Rightarrow E > C$$

$$\Rightarrow B > E > C$$

By putting in Eq. (i), we get

$$A < D$$

$$\Rightarrow D > A > B > E > C$$

4. (d) $22 = 12 \times 2 - 2$
 $69 = 22 \times 3 + 3$
 $272 = 69 \times 4 - 4$
 $1365 = 272 \times 5 + 5$
 $? = 1365 \times 6 - 6 = 8184$

5. (d) Only two 5 satisfies the requirement.

6. (a)

[11, 5] Ans.

7. (d) The given pattern follows the three series.

$$I \rightarrow 61 \xrightarrow{+0} 61 \xrightarrow{+0} 61$$

$$II \rightarrow 57 \xrightarrow{-14} 43 \xrightarrow{-14} 29$$

$$III \rightarrow 50 \xrightarrow{-14} 36 \xrightarrow{-14} 22$$

8. (b) Given series, 3, 6, 6, 12, 9,, 12

Split the given series into two parts

9. (b)

10. (d)

or $2 = 1^3 + 1$, $9 = 2^3 + 1$, $28 = 3^3 + 1$,
 $65 = 4^3 + 1$, $126 = 5^3 + 1$
and $344 = 7^3 + 1$
But $216 = 6^3 + 0$ which is odd number among them.

11. Take the condition (iv)

The possible number of coin in the chest = 10, 16, 22, 28, 34, 40, 46, 52, 58, 62, 68, 74, 80, 86, 92, 98 From the above possible number which satisfied condition (iii) = 28, 58, 68, 98

From the number which satisfied condition

(i), the possible number which satisfied condition

(ii) = 58, 98

From the possible number which satisfied condition

(iii), the possible number which satisfied condition

(iv) = 58

.. The number of coin in the chest is 58.

12. (b) The pattern of series is as follows:

$$A \xrightarrow{(B)} CD \xrightarrow{(EF)} GHI \xrightarrow{(J,K,L)} MNOP \xrightarrow{(Q,R,S,T)} UVWXY$$

13. (c) Series is increasing in three consecutive terms like 42 40 38; 35 33 31; 28 26 24

14. (a) Given series

120, 99, 80, 63, 48, ...

We have the following pattern

Hence, the number that comes next in the series is 35.

15. (c) 1, 2, 3, 6, 11, 20, 37, 68,...

The above series is showing the following pattern. We have to sum the three numbers

i.e.

$$1 + 2 + 3 = 6$$

$$2 + 3 + 6 = 11$$

$$3 + 6 + 11 = 20$$

$$11 + 20 + 37 = 68$$

$$20 + 37 + 68 = 125$$

So, the number that comes next in the series, is 125.

16. (c) In the word CYBERNETICS,
I occupies the same position as it does in the English
alphabet. The place value of 'I' is 9.

Solutions [Q. Nos. 17 & 18]

AN BQ CP D Q E R F S G T HU IV JW KXLY MZ

17. (c) 7th letter from the left is D and 3rd letter to the right
of D would be 'R'.

18. (b) The eighteenth letter from the beginning is V and
fifteenth letter from the last is S. So, H will be exactly in
between S and V.

19. (c) ZA₅, Y₄B, XC₆, W₃D - -

The pattern is as follows:

So, VE, and U₂F will be fit in the blanks.

20. (d) 61, 52, 63, 94?

The number formed by reversing the digit of each
number of the sequence is square of consecutive
natural numbers starting from 4. See how,

$$61 \dots 16 = 4^2$$

$$52 \dots 25 = 5^2$$

$$63 \dots 36 = 6^2$$

$$94 \dots 49 = 7^2$$

Therefore, the required number = $8^2 = 64 = 46$.

21. (a) 4, 7, 25, 10, 20, 16, 19

The pattern is as follows:

Two series alternate here, with every third number
following a different patterns. In the main series, 3 is
added to each number to arrive at the next. In the
alternating series, 5 is subtracted from each number to
arrive at the next.

22. (c) Number of terms in

1st series $817 = 17 + (m - 1)4$
 $\Rightarrow m = 201$
 2nd series, $851 = 16 + (n - 1)5$
 $\Rightarrow n = 168$

Now, $17 + (m - 1)4 = 16 + (n - 1)5$

$\Rightarrow 4m + 2 = 5n$

For, $m = 2, n = 2$

$m = 7, n = 6$

$m = 12, n = 10$

$m = 17, n = 14$

It also form a series.

$\therefore$ Number of common terms.

$197 = 2 + (P - 1) 5$

$P = 40$

23. (a)

NECESSARY

There is only one such pair NS.

24. (a) The series is as follows

$$4$$

$$7$$

$$7 + 4 = 11$$

$$11 + 7 = 18$$

$$11 + 18 = 29$$

$$18 + 29 = 47$$

$$29 + 47 = 76$$

$$47 + 76 = 123$$

$$76 + 123 = 199$$

$\therefore$ Missing term = 76

25. (a) Decimal 99 is represented in different number system
in the series.

99	90	83	78	[71]	[69]
Base = 10	Base = 11	Base = 12	Base = 13	Base = 14	Base = 15
$= 9 \times 10 + 9$	$= 9 \times 11 + 0$	$= 8 \times 12 + 3$	$= 7 \times 13 + 8$	$= 7 \times 14 + 1$	$= 6 \times 15 + 9$
$= (99)_{10}$	$= (90)_{11}$	$= (83)_{12}$	$= (78)_{13}$	$= (71)_{14}$	$= (69)_{15}$

Hence, (71,69) is the correct answer.

- 26 (a) The pattern of the series is as follows

$$336 \quad 210 \quad 120 \quad 60 \quad [24] \quad 6$$

$$\downarrow \quad \downarrow \quad \downarrow \quad \downarrow \quad \downarrow \quad \downarrow$$

$$= 7^3 - 7 \quad = 6^3 - 6 \quad = 5^3 - 5 \quad = 4^3 - 4 \quad = 3^3 - 3 \quad = 2^3 - 2$$

27. (d)

So the missing term = LKPO

28. (a) The pattern of the series is as follows

29. (c)

The pattern of the series is as follows

30. (c) The pattern of the series is as follows

31. (d) Here, the pattern of the series is
Hence, 2124 is the wrong number.

32. (b) The pattern of the series is,

$$(1)^2 = 1 \times 3 = 3$$

$$\downarrow +2$$

$$(2)^2 = 4 \times 5 = 20$$

$$\downarrow +2$$

$$(3)^2 = 9 \times 7 = 63$$

$$\downarrow +2$$

$$(4)^2 = 16 \times 9 = 144$$

$$\downarrow +2$$

$$(5)^2 = 25 \times 11 = 275$$

$$\downarrow +2$$

$$(6)^2 = 36 \times 13 = 468$$

33. (b) Here, the pattern of the series is,

34. (c) The pattern of the series is as follows

$$1 + 2 + 3 = 6$$

$$2 + 3 + 6 = 11$$

$$3 + 6 + 11 = 20$$

$$6 + 11 + 20 = 37$$

$$11 + 20 + 37 = 68$$

$$20 + 37 + 68 = 125$$

Hence, the required number is 125.

35. (a) The pattern of the series is

$$= 74$$

36. (d) According to the given question.

First letter of each term

$$E \rightarrow G \rightarrow I \rightarrow K \rightarrow M$$

$$+2 \quad +2 \quad +2 \quad +2$$

Second letter of each term, is same

$$L \rightarrow L \rightarrow L \rightarrow L \rightarrow L$$

Third letter of each term:

$$F \rightarrow H \rightarrow J \rightarrow L \rightarrow N$$

$$+2 \quad +2 \quad +2 \quad +2$$

Fourth letter of each term (is same)

$$A \rightarrow A \rightarrow A \rightarrow A \rightarrow A$$

∴ The series in the blanks is KLLA.

∴ The correct answer is option (d).

37. (c) Given series

The pattern follows is $2 + 2^2 + 2^3 + 2^4$

So, 84 is wrong and must be replaced by $(70 + 16)$ i.e. 86.

∴ The correct answer is option (c).

38. (c) Pattern of the series as follows

39. (d) Pattern of the series as follows

40. (b) Pattern of the series as follows:

41. (a) Pattern of the series as follows

42. (a) Pattern of the series is as follows,

43. (a) Pattern of the series is as follows,

$$\therefore ? = 210.$$

44. (a) Pattern of the series is as follows.

45. (a) Pattern of the series is as follows.

$\therefore ? = JWW$

46. (c) Pattern of the series is as follows,

47. (a) Pattern of the series is as follows,

$\therefore$ Wrong number = -145

48. (b) Pattern of the series is as follows,

49. (d) The pattern of the series is as follows,
