

- There are five books P, Q, R, S, T. R is above S, Q is below P. P is below S, Q is below T. Which book occupies the lowest place. **(Ranking) NIMCET-2007**
(a)P (b)Q (c)R (d)S
- In a class, six students P, Q, R, S, T and U are the top six rank holders, not necessarily in the same order. R did not get the 4th rank. P's rank is higher than U's and R's but lower than Q's. Among these six rankers, there are four students whose ranks are lower than S's rank and five students whose ranks are above that of T. who is ranked 5th in the class? **(Ranking) NIMCET-2008**
(a)U (b)T (c)R (d)None
- The letters P, Q, R, S, T, U and V not necessarily in that order represents seven consecutive integers from 22 to 33. U is as much less than Q as R is greater than S. V is greater than U. Q is the middle term. P is 3 greater than S. **(Ranking) NIMCET-2008**
Can you find the sequence of letters from the lowest value to the highest value?
(a)PVSQRTU (b)SUTQPRV
(c)USVQPRV (d)TUSQPRV
- The position of A in a class is 5th from the top and position of B is 7th from the bottom. If C is at 6th place after A and 6th place before B, how many students are there in the class? **(Ranking) NIMCET-2011**
(a)25 (b)23 (c)21 (d)22

Directions (Q.Nos. 5- 7) Read the following passage carefully and answer the questions.

Six boys A, B, C, D, E and F are marching in a line. They are arranged according to their heights, the tallest being at the back and the shortest in the front. F is between B and A. E is shorter than D but taller than C who is taller than A. E and F have two boys between them. A is not shortest among them.

(Ranking) NIMCET-2012

- Where is E?
(a) Between A and B
(b) Between C and A
(c) Between D and C
(d) In front of C
- If we start counting from the shortest, which boy is fourth in the line?
(a) E
(b) A
(c) D
(d) C
- Who is next to the shortest?
(a) C
(b) B
(c) E
(d) F
- The letters P, Q, R, S, T, U and V not necessarily in that order represent seven consecutive integers from 22 to 33 and **(Ranking) NIMCET-2012**
1. U is as much less than Q as R is greater than S.

- V is greater than U.
 - Q is the middle term.
 - P is greater than S.
- Then, the sequence of letters from the lowest value to the highest value, is
(a) TVPQRSU
(b) TRSQUPV
(c) TUSQRPV
(d) TVPQSRU
- There are four brother Alan, Bob, Carl and Dave. Dave is two years older than Bob. Bob is one year younger than Carl. Alan, who is 34, is two years younger than Carl. Who is the oldest? **(Ranking) NIMCET 2013**
(a)Alan (b)Bob
(c)Carl (d)Dave
 - Shyam is taller than Pradeep and Pradeep is as tall as Anurag. But Anand is shorter than Suresh, who is as tall as Anurag. If Pradeep is taller than Praveen, then who is the tallest of all? **(Ranking) NIMCET 2013**
(a)Pradeep (b)Praveen
(c)Suresh (d)Shyam

Directions (Q. Nos. 11-12) **(Ranking) NIMCET 2013**

- Anu is taller than Cini.
 - Eenu is shorter than Binu.
 - Anu is shorter than Danny.
 - Eenu is taller than Anu.
- The best answer to 'who is the tallest?' is
(a) Dany (c) Dany or Binu
(b) Binu (d) Both Dany and Binu
 - Who is the shortest?
(a) Cini (b) Anu or Cini
(c) Eenu (d) Insufficient data to conclude
 - Which of the following statements would help to logically order the persons according to their heights?
(a) Binu is 7 feet tall
(b) Dany and Binu do not have equal height
(c) Eenu is the tallest in the group
(d) Dany is the tallest in the group
 - There are five books A, B, C, D and E placed on a table. A is placed below E, C is placed D, B is placed below A and D is placed between A and E, then which of the following books can be on the top?
(a) D or E (b) C or E
(c) A or E (d) None of these
(Ranking) NIMCET-2015
 - Among five children A, B, C, D and E, B is taller than E but shorter than D. A is shorter than C but taller than D. If all the children stand in a line according to their heights, then who would be the fourth if counted from the tallest one?
(a) D (b) C
(c) B (d) A
(Ranking) NIMCET-2015
 - P, Q, R, S, T, U and V are sitting in a row facing North. In order determine, who is sitting exactly in the middle of

the row, which of the following information is needed?

(Ranking) NIMCET-2015

- I. T and U are sitting at extreme ends of the row.
- II. S is third to the right of T
- III. Q is four places to the left of R and P is two places of the left of V

- (a) I and II only are sufficient
- (b) I and III only are sufficient
- (c) I and either II or III are sufficient
- (d) I, II and III

Directions (Q. Nos. 17 to 20) : Are based on the following: Eight friends J, K, L, M, N, O, P and Q live on eight different floors of a building but not necessarily in same order. The lower most floor of the building is numbered one, the above that numbered two and soon until the top most floor is numbered eight.

(Ranking) NIMCET-2016

- J lives on floor numbered six.
- Only one person lives between J and L.
- O lives on the floor immediately below L.
- Only one person lives between O and P.
- O lives above P.
- K lives on an even numbered floor but not on the floor numbered two.
- Two persons live between K and Q.
- Q does not live on the lower most floor
- N lives on one of the floor above Q.

17. If P and L Interchange their places, who will live between P and M?

- (a) O
- (b) L
- (c) J
- (d) No one

18. Which of the following is True about 'M'?

- (a) K lives immediately above M
- (b) Only two people live between M and Q
- (c) M lives on an odd numbered floor
- (d) M lives on the lower most floor

19. Who amongst the following lives on the floor number eight?

- (a) P
- (b) O
- (c) K
- (d) Cannot be determined

20. Three of the following four are alike in a certain way based on the given arrangement and thus form a group. Which of the following does not belong to the group?

- (a) PL
- (b) MQ
- (c) LN
- (d) OM

21. P, Q, R, S, T and U are sitting in two rows, three in each row facing each other. **(Ranking) NIMCET-2017**

- R is second to the left of P.
- Q and T are facing each other.
- S and P are diagonally opposite to each other.
- Q is not a neighbour of R.

Which of the following are sitting in a row?

- (a) P, Q, R
- (b) P, U, S
- (c) U, T, S
- (d) P, T, R

22. Each of the five people K, L, M, P and Q is of a different weight. It is known that the number of people heavier than P is the same as the number of people lighter than Q. L is the heaviest and K is not the lightest. Who is the lightest?

(Ranking) NIMCET-2019

- (a) M
- (b) L
- (c) Q
- (d) P

23. Read the information given below and answer the questions that follow: **(Ranking) NIMCET-2020**

- (i) $A*B$ means $\rightarrow$ A and B are of the same age
- (ii) $A-B$ means $\rightarrow$ B is younger than A
- (iii) $A+ B$ means $\rightarrow$ A is younger than B

Sachin *Madan- Reena means?

- (a) Reena is youngest
- (b) Reena is oldest
- (c) Madan is younger than Reena
- (d) Madan is youngest

24. Read the information given below and answer the questions that follows **(Ranking) NIMCET-2020**

- (i) $A*B$ means $\rightarrow$ A and B are of the same age
- (ii) $A-B$ means $\rightarrow$ B is younger than A
- (iii) $A+ B$ means $\rightarrow$ A is younger than B

$X+Y+Z$ is same as.....?

- (a) $Y-X-Z$
- (b) $Z-Y-X$
- (c) $Z-X-Y$
- (d) $X-Y-Z$

25. In a class of 50 students, Raghu's rank is twice that of Paul. There are 10 students who have ranked worse than that of Raghu. Paul's rank in the class is **(Ranking) NIMCET-2021**

- (a) 5th
- (b) 10th
- (c) 15th
- (d) 20th

26. Deepak, Rahul, Manoj and Vinod are brothers. Who is the heaviest?

I. Rahul is heavier than Deepak and vinod, but lighter than Manoj.

II. Deepak is lighter than Rahul and Manoj.

But heavier than Vinod

- (a) Data in both the statements together are not sufficient.
- (b) Statement II alone is sufficient, but Statement I alone is not sufficient.
- (c) Either I or II sufficient.
- (d) Statement I alone is sufficient, but Statement II alone is not sufficient. **(Ranking) NIMCET-2022**

27. Shweta, Yamini, Pooja and Rakhi are sisters. Yamini is older than at least two of her sisters. Pooja is younger than Rakhi, who is not the oldest. Shweta is older than Pooja but younger than Rakhi. Shweta is older than Pooja but younger than Rakhi. Who is the oldest among them?

(Ranking) NIMCET-2023

- (a) Pooja
- (b) Yamini
- (c) Shweta
- (d) Rakhi

ANSWER

1	b	2	c	3	d	4	b	5	c
6	d	7	d	8	c	9	d	10	d
11	c	12	a	13	d	14	d	15	c
16	a	17	a	18	b	19	c	20	d
21	a	22	a	23	a	24	b	25	d
26	d	27	b						

Solution:

1. (b)

R
|
S
|
P
|
Q—T

Lowest place = Q

2. (c)

Q
S
P
U
R
T

Rank from data, top is bottom
Is given.
Hence, R's rank is 5th in the class.

3. (d)

From given information's, we get

$$Q - U - R - S;$$

$$V > U; P = S + 3$$

⇒ Sequence from the lowest to the highest
T U S Q R P V

4. (b)

C's position from the top = 5th 6th 11th

C's position from the bottom = 7th + 6th

$$= 13\text{th } 5\text{th}$$

A Hence, total number of students in the class

$$= (11+13) - 1$$

$$= 23 \text{ 6th}$$

Solution (Q.Nos. 5-7)

By condition DECAFB (Shortest) ↓ (Longest)

5. (c) Between D and C

6. (d) C

7. (d) F

8. (c) By given condition, we get the required order (sequence) of letters from the lowest value to the highest value is

$$T < U < S < Q < R < P < V$$

i.e., TUSQRPV

9. (d) Given, Alan's age = 34 yr
Carl's age = 34 + 2 = 36 yr
Bob's age = 36 - 1 = 35 yr
Dave's age = 35 + 2 = 37 yr
Hence, Dave is the oldest among them.

10. (d) According to the question,

Shyam > Pradeep = Anurag Suresh > (Anand, Praveen)
Hence, Shyam is tallest among them.

Solutions [Q. Nos. 11 to 12]

Anu > Cini ... (i)

Binu > Eenu ... (ii)

Dany > Anu ... (iii)

Eenu > Anu ... (iv)

Combining all the equations,

$$(Dany, Binu) > Eenu > Anu > Cini$$

11. (c) Dany or Binu is the tallest among them.

12. (a) Cini is the shortest among them.

13. (d) Dany is the tallest in the group, which would help to logically order the persons according to their heights.

14. (d) From the statements,

A is placed below E

E
A

C is placed below D

D
C

B is placed below A

A
B

D is placed between A and E, then

E
D
A
B
C

So, E will be on the top.

15. (c) Given that

B is taller than E but shorter than D.

$$D > B > E$$

A is shorter than C but taller than D.

$$D < A < C$$

Then the order is

$$C > A > D > B > E$$

$$1 \quad 2 \quad 3 \quad 4 \quad 5$$

So, B is fourth.

16. (a) From the statement I

1-T and U are sitting at extreme ends of the row.

Case I T U

Case II U T

From statement II

S is third to the right of T.

Then, from case I

T S U

So, S is sitting exactly in the middle.

So, only statement I and II are sufficient.

Solutions (Q. Nos. 17- 20)

From the given information the order will be as

8	K
7	N
6	J
5	Q
4	L
3	O
2	M
1	P

Hence, Statement I alone is sufficient, but Statement II alone is not sufficient.

27. (b) According to the question,
Yamini > Rakhi > Shweta > Pooja
So, Yamini is the oldest among them.

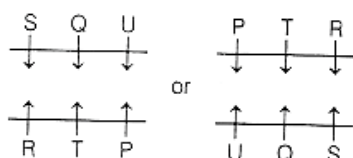

17. (a) After interchanging the places, O lives between P and M.

18. (b) Only two people live between M and Q.

19. (c) K lives on floor number 8.

20. (d) Only O and M are adjacent to each other.

21. (a) The arrangement is as follows

22. (a) According to question

$$L > P > K > Q > M$$

So, least weight or lightest is M.

23. (a) Given question,
Sachin * Madan – Reena
⇒ It means Sachin and Madan are of the same age and Reena is younger than Madan. The means that Reena is the youngest.
∴ The correct answer is option (a).

24. (b) As per the given question.
⇒ $X + Y + Z$ means X is younger than Y and Y is younger than Z.
This means that x is the youngest.
∴ The $X + Y + Z$ is same as $Z - Y - X$
∴ The correct answer is option (b).

25. (d) Total number of students in the class = 50

Let Paul's rank = x

So, Raghu's rank = $2x$

∴ 10 students who have ranked worse than that of Raghu.

∴ Raghu's rank = 40

So, Paul's rank = $\frac{40}{2} = 20$ th

26. (d) From Statement I, Manoj > Rahul > Deepak and Vinod

From Statement II, Rahul and Manoj > Deepak > Vinod
