

ANALYTICAL ABILITY & LOGICAL REASONING

1.

- (a)9 (b)6 (c)10 (d)12

2. If + means $\div$, - means $\times$, $\div$ means - and $\times$ means +, then the value of $10 - 14 \times 8 + 2 \div 16 + 8$:

- (a)142 (b)144 (c)145 (d)none

3. A cube has its 6 faces having different colours(red , blue , green , yellow , white and orange). It has been given that green is opposite to red, blue is between green and red, yellow is adjacent to orange, What colours are on the adjacent faces of face having yellow colours

- (a) green, orange, blue, red
(b) red, blue, green, white
(c) green, blue, white, orange
(d) green, orange, red, white

4. Mona was 3 times as old as Radha 6 years ago and will be $\frac{5}{3}$ times as old as Radha after 6 years. What is the present age of Radha?

- (a)11 (b)12 (c)13 (d)none

5. There are five books P, Q, R, S, T. R is above S, Q is below P. P is below S, Q is below T. Which book occupies the lowest place.

- (a)P (b)Q (c)R (d)S

6. Count the number of Pentagons:

- (a)12 (b)13 (c)16 (d)none

7. N F M A T. The given letters have certain similar characteristics. One is different from others. Find the odd one :

- (a)N (b)F (c)A (d)T

8. Number of triangles and squares in the following figures:

- (a)32 triangles, 10 squares
(b)32 triangles, 8 squares
(c)28 triangles, 10 squares
(d)28 triangles, 8 squares

9. A, B and C gets into partnership. A invests thrice as B and B invests $\frac{2}{3}$ as C. If the total profit gained of the end of the year is 6600/-. Calculate B's share:

- (a)2000 (b)2500 (c)3000 (d)none

10. The average age of a group going for picnic is 16 yrs 20 persons with average age 15 yrs join them so that the average age becomes 15.5 years. Then the number of persons who were initially going for picnic:

- (a)10 (b)20 (c)18 (d)none

11. A train travels at an average speed of 100 kmph stopping for 3 minutes after every 75 kms. How much time it will take to reach a station which is 600 km from the point of start :

- (a)6 hrs. 24 min. (b)6 hrs. 21 min.
(c)6 hrs. (d)none

12. An inspector rejects 0.08% of the sample, those being directive. How many samples should be inspect to reject 2 of them:

- (a)2000 (b)2500 (c)2250 (d)none

Directions for Q. 13 and Q. 14: The following questions contains a series of numbers of which one is incorrect. Select the incorrect one.

13. 3, 51, 51055, 255255

- (a)51 (b)55 (c)51055 (d) 255255

14. 1015, 799, 674, 615, 583, 575

- (a)799 (b)615 (c)674 (d)583

Directions for Q. 15 and Q. 16: Read the following paragraph to answer question 21-22. Radha has one unmarried daughter and two sons. Mona is daughter in law of Bharat. Suraj is brother of Kamal but Mona is not his wife. Usha's daughter Madhu is Kamal's niece. Ashok's son Arun is Madhu's cousin.

15. Who among the following pairs are mother and son.

- (a)Usha and Kamal (b)Radha and Suraj
(c)Madhu and Ashoka (d)Mona and Suraj

16. How is Bharat related to Madhu:

- (a)Father (b)Grandfather
(c)Cousin (d)Brothe

17. A thief after stealing, went off in a Santro with a speed 40 kmph. The owner of the house discovered the theft after half an hour and then he set off on his wife at a speed of 50 kmph. At what time, he will catch up the thief after his start:

- (a)2 hrs. (b)2.30 hrs.
(c)3 hrs. (d)none

18. A shopkeeper sells half of the oranges he had plus 1 to the first customers. Then $\frac{1}{3}$ of the remaining plus 1 to

his second customer and $\frac{1}{5}$ of the remaining plus 1 to his third customer. If he is left with 3 oranges at the end, then initially he had:

- (a) 12 oranges (b) 24 oranges
(c) 36 oranges (d) none

19. A, B, D, E, F, G are consecutive integers between 1-10 not in same order satisfying the following conditions. D is 3 less than A, F is as much less than A as C is greater than D, B occupy central position. If $A = 6$, then the sum of E and G.

- (a) 8 (b) 12 (c) 15 (d) none

20. Two trains each of length 500 m are travelling in opposite direction with speeds 45 kmph and 30 kmph respectively. In what time, slower train will pass the driver of faster train.

- (a) 30 sec (b) 60 sec (c) 50 sec (d) none

21. A train starts from a station with certain passengers. At its first half, half of the passenger gets down. At the end, it is left with 360 passenger. How many passengers were there in the train initially:

- (a) 3600 (b) 4500 (c) 3000 (d) none

22. In a photo session of a family, father is to the left of son but to the right of grandfather. Mother is in right of daughter but left of grandfather. Who is in the centre:

- (a) Daughter (b) Grandfather
(c) Mother (d) Father

23. The smallest number which when divided by 2, 3, 4, 5 leaves 1 as remainder in each case but, leaves no remainder when divided by 7:

- (a) 231 (b) 301 (c) 331 (d) none

24. Three thieves stole in a bakery bread shop one by one. Each took with him half of the present bread plus half bread. If at last 3 breads are left. Then initially the bakery shop had breads:

- (a) 15 (b) 31 (c) 24 (d) none

25. Which number should be subtracted from the highest four digit number to make it a perfect square:

- (a) 197 (b) 198 (c) 159 (d) none

Directions for Questions Q 26 to Q 28 : Read the following information carefully and answer the questions that follow :

- (i) Jayant, Kamal, Namita, Asha and Tanmay are five members of a family.
(ii) They have their birth dates from January to May, each member in one of these months.
(iii) Each one likes one particular item for his/her birthday out of Bengali Sweets, Chocolates, Pastries, Ice Cream and Dry Fruits.

(iv) The one who likes Pastries is born in the month which is exactly middle in the months given.

(v) Asha does not like Ice cream but brings Chocolates for Jayant in February.

(vi) Tanmay who is fond of Bengali sweets is born in the next month immediately after Namita.

(vii) Namita does not like Dry fruits or Ice cream

26. What is the choice of Asha?

- (a) Pastries (b) Dry fruits
(c) Bengali sweets (d) Cannot be determined

27. Which combination of month and item is true for Jayant?

- (a) March — Pastries (b) February — Pastries
(c) None of these (d) Cannot be determined

28. What is the choice of Kamal?

- (a) Ice cream (b) Bengali sweets
(c) Dry fruit (d) Cannot be determined

29. In which month was Kamal born ?

- (a) January (b) May
(c) January or May (d) Data inadequate

Directions for Questions Q.30 to Q.34 :

Read the following information carefully and answer the questions that follow :

- (i) There are eight faculty members A, B, C, D, E, F, G and H in the institute, each teaching a different subject.
(ii) There are three lady members and of the eight, four are holding Ph.D Degree.
(iii) E teaches Psychology and is Ph.D. A teaches Chemistry.
(iv) The one who teaches Economics is not Ph.D. No lady member teaches either Commerce or Law. Law faculty does not award Ph.D.
(v) D and G do not teach either Commerce or Physics.
(vi) H and C are lady members and are not Ph.D. F who is Ph.D. teaches Zoology.
(vii) B and G are Ph.Ds and G is a lady member.

30. Who teaches Physics ?

- (a) C (b) Either H or C
(c) C and D (d) Cannot be determined

31. Which of the following lady members is/are Ph.D. ?

- (a) G (b) G and H
(c) C and D (d) Cannot be determined

32. Which of the following statements is true ?

- (a) Two lady members are Ph.D
(b) Three male members are Ph.D
(c) The person who teaches Zoology is not Ph.D.
(d) The person who teaches Economics is Ph.D.

33. Which of the following combination is not correct ?

MAARULA CLASSES

- (a) Commerce -Male - Ph.D
(b) Economics-Lady-Non-Ph.D.
(c) Physics-Lady-Ph.D.
(d) Zoology-Male-Ph.D.
34. What is the subject taught by G ?
(a) Zoology
(b) Either Physics or Zoology
(c) Either Physics or Economics
(d) Cannot be determined
35. Suppose in the data of problem 41, we say that HCF of any pair of number is h and the maximum possible number of elements in set is 4, then the maximum possible value of h is
(a)2 (b)3 (c)4 (d)None
36. The chances of throwing up a number that is greater than 8, 5 and 10 in that order in 3 throws of 2 dices simultaneously is
(a)7/486 (b)15/972 (c)33/1944 (d)65/3888
37. In a group there are 13 boys and 7 girls with brown hair. 15 person don't have brown hair. Then the maximum number of persons the group can have, is
(a)26 (b)25 (c)39 (d)None
38. Assume the data of question 45, i.e. the previous one. The minimum number of persons in the group is
(a)13 (b)26 (c)25 (d)None
39. How many arrangements of four 0's, two 1's and two 2's are there in which the first 1 occurs before the first 2?
(a)210 (b)420 (c)105 (d)None

40. A girl starts to paint a fence on one day. On the second day two more girls join her and on the third day three more girls join the group and so on and so forth. If the fence is completely painted in this manner in 20 days, then the number of days, in which 10 boys painting together can paint fence completely given a boy can paint twice as fast as a girl can, is

- (a)154 (b)77 (c)36 (d)72
(a)Spring is to summer (b)Sun is to Moon
(c)Week is to Month (d)Birth is to Death
